About Us

Nexant Consulting LLP (NCL) is a multi-disciplinary construction management and engineering consulting firm servicing a variety of industries and delivering infrastructure projects. We have extensive expertise and experience in Railway Engineering works (tracks, signalling, telecoms, power & electrification), Major Civil Engineering projects (stations, depots, highways, bridges, buildings, etc.), as well as Asset Management. NCL is committed to delivering excellence to stakeholders - contractors, owners, engineers, architects and financial institutions by maintaining the highest standards of quality for consulting services within the construction industry.

We assist our clients in overcoming complicated construction-related situations and accomplishing their project objectives through industry awareness, practical business knowledge and innovative technology experience. NCL customises services to meet each client's particular needs in the management, oversight and investigation of construction projects. Our construction management consultants work personally with each client throughout the duration of the project to ensure that clients meet their project goals and budgets.

Our focus on clients and results consistently earns us respect and allows us to complete each project effectively and within our client's specific parameters. Consequently, our number one source for business is repeat clients and referrals from current and previous clients.

What we offer

NCL's construction and project management consultants have assisted a wide range of clients on a myriad of projects throughout the world. From front end planning, design, and project management to construction claims and litigation consulting, we have successfully provided proactive and cost effective project support for decades in a range of professional areas to include:

- Strategic Project Planning
- Feasibility Studies
- Project Due Diligence
- Front End Planning
- Design/Supply/Maintain
- Strategic Asset Management
- Sustainability Consulting
- Project-Scope Definition & Development

VISION/MISSION

Our Vision

"Globally setting a tradition of excellent consultancy services that continually exceeds customer expectations"

Our Mission

"To deliver world class infrastructure and engineering consultancy services by reinforcing our worldwide corporate alliances and upholding top-tier quality and ethical standards"

SERVICES

Project Planning

Plan to succeed

With some thoughtful planning you can ensure your project's success before it begins. From establishing scope and viability, to budget, schedule and team requirements, to process implementation and ongoing evaluation, Nexant can help tailor a plan for your specific project needs. This includes gauging risk and developing mitigation strategies that will help you save time and money. From concept to closeout, we will help you develop a plan you can build on.

Project Management and Delivery

In order to fully implement the scope of any project as given by the client, Nexant will fully monitor and manage the Project from inception to completion; including planning, programme management, engineering management, estimating, construction and Handover. We will provide end to end engineering solutions and ensure the project is seamlessly delivered to Time, Budget and Quality by adopting the following project management and project engineering processes.

Engineering Design

Design with imagination

Nexant has solid, proven expertise in the design of Rail structures and infrastructural systems, as well as design of other Major Civil Engineering projects. Our multi-disciplinary approach and long established track record enables us to tailor design any project with emphasis on innovation, cost effectiveness, quality of work, maintainability and environment.

No project is 'typical' at NCL. Backed by our cross functional support and feedback from the construction management division, our designs consider all the construction methodologies and complexities

Litigation Support

The advantage of expertise

For a dispute to be resolved, you need information that is clear, concise and objective. Our experienced consulting and testifying experts analyse individual dispute situations and provide the objective and technical assessment needed to reach resolution. From mediation, arbitration and litigation consulting to expert testimony, we have the services to support you in every phase of the dispute resolution process.

Training

Knowledge you can apply

Infrastructure projects are increasingly complex so effective management skills are required to ensure quality, schedule and cost requirements are met. Our Subject Matter Experts lead by example, facilitating effective knowledge transfer to ensure competencies amongst Nigerians and hence sustained growth in locally available specialist talent pool. We arrange customized seminars and training sessions to provide attendees at different levels, with an array of tools that can be immediately integrated into their repertoire. Whether in-house presentations, online seminars or multi-day sessions, our experts deliver cost effective real world instruction for today's engineering professional.
